

Childrens Flu Vaccination

Has your child received their flu vaccine this year?

If the answer is **NO**, there is still time to get protected.

The annual flu vaccine is recommended for all children from the age of two (age on 31 August, 2023) up to and including school year 11.

Flu is still circulating in our communities and vaccination continues to be the best way to protect you and your family from the consequences of flu this winter.

We are offering the children's flu nasal spray vaccine through our main vaccination centres this January.

No appointment needed - please ensure that when your child attends, they are with a parent or legal guardian who can consent on their behalf.

If your child takes regular medication, please bring a list of this with you.

Bronllys Vaccination Centre, Bronllys Hospital, Bronllys
